

BitStack

DISRUPT REALITY!

Welcome to the Data Training Sessions!

In this course, you will explore essential techniques in data management and security, including data scraping, data encrypting, and web scraping.

Throughout the sessions, you will gain practical skills and insights into handling data effectively and securely.

Data Scraping:

- Introduction to Data Scraping
- Techniques for Data Scraping
- Best Practices and Considerations

Data Encrypting:

- Understanding Data Encryption
- Implementing Data Encryption
- Securing Data Storage and Transmission

Web Scraping:

- Overview of Web Scraping
- Practical Applications of Web Scraping
- Hands-on Web Scraping Projects

Package No.4 : Blockchain & Data Program (BDP)

- **Blockchain & Data Training Sessions**
- **Hybrid Project**
